

Coding and Marking inks

We have solutions available for most of the leading brands currently being used in the market such **Domino, Hitachi, Imaje, Linx, Rea, Videojet and Willett** printers.

All our inks are generally available in OEM equivalent packaging making for easy plug and print installation without a need for a technician, so no printer down-time.

Our inks are designed so that you can use them directly on top of the OEM ink. In a limited number of cases in order to improve the perimeters and surpass the specification of the original ink we have enhanced our formulation. In these cases we recommend a complete flush before the introduction of the new ink.

For Piezo technology we have a range of Solvent, UV and Oil based inks.

Who we are

About Us

Think Ink Solutions is a UK based company offering a variety of products for many ink jet applications. From **Eco Solvent to Hard Solvent, Grand Format, Textile, Postal, UV, Coding & Marking** and **water based inks** we have a comprehensive range of products.

Our experienced development team are able to offer custom ink formulations for the Graphics and Industrial markets.

Think Ink Solutions Ltd has broadened the range of services to include a **Blending and Toll manufacturing service** for a wide range of solutions such as solvent based blends, 100% solid and standard aqueous products.
